

Tip of the Week 4:  
Rare Patient Voice

## Sign Up and Enjoy Patient Benefits

I had the pleasure of meeting Wes Michael, President and Founder and Pam Cusick, Vice President, Business Development of Rare Patient Voice last weekend. Rare Patient Voice, LLC was formed to provide patients with rare diseases and their caregivers an opportunity to voice their opinions through surveys and interviews to improve medical products and services.

**For Patients and Caregivers** — They provide patients and caregivers the opportunity to voice their opinions to improve medical products and services while earning cash rewards.

**One thought that came to mind:** "If this paid participation is due to my child's conditions or the medications he/she takes, then the proceeds could be a fund for adaptive toys, therapies, equipment and so forth."

***"We all have items that insurance will not cover, or adaptive toys that seem to remain on our wish list forever."***
